Multimedia Development

Although Multi Media is a new and still emerging technology, RISL has already made a mark in this area too. We undertake a variety of Multi Media applications and projects. Our major experience has been in:

- Multi Media Information Kiosk
- CD Publishing
- Customized Graphics and Animation Development
- Virtual Reality - Visual Walkthrough & Simulation
- Preparing Profiles and Corporate Presentations

GIS Development

A pioneering work in India has been done by RISL in the field of Geographical Information System. A Decision Support System - Vikas Darpan - based on GIS has been developed by RISL to facilitate resource based decentralized planning at all the District headquarters. The queries with regards to GIS maps & attribute data, up to village level, are also taken care of, on assignment basis. We have expertise in

- GIS based Decision Support System
- Adhoc Query Handling w.r.t. GIS maps and Data attributes
- Development of Resource based Atlas
- Application Development for GIS
