2. PROJECT PROFILE & BACKGROUND INFORMATION

1) Project Background

- a. Government of Rajasthan is utilizing the benefits of Information Technology to bring about radical changes in the way various processes are carried out presently to improve the Accountability, Transparency & Effectiveness in Government administration. The ultimate objective is to arm the Government with IT enabled systems to assist them in carrying out their day-to-day functions to help deliver G2G, G2B and G2E services.
- b. RajComp Info Services Ltd. (RISL) is a State level implementing agency for various e-Governance projects in the state.
- c. To strengthen the Ease of Doing Business, Government of Rajasthan has automated the Building Plan Approval system in the state. This has enabled the clearance of projects at rapid pace. The system is fully automated and would not require any manual intervention after the request is submitted and till the scrutiny report is generated.
- d. The system is hosted in State Data Centre and made operational through Single Window Clearance System (SWCS for all business activity units) and Single Sign On portals (SSO for all citizens).
- e. The entire system is divided in two parts and works in an integrated manner
 - i. **Application & workflow (SWCS / SSO):** Users can submit their proposal for building plan approval by filling the proposal details in the application form through online system along-with necessary documents and drawing. After submission of application with drawing (for approval), the drawing file is pushed to scrutiny engine for scrutiny. Once scrutiny is completed, a scrutiny report is generated and the application with scrutiny report is forwarded to next level in defined workflow system for taking final decision.
 - ii. **Scrutiny Engine:** Once a proposal (2D drawing file or 3D BIM Model) is received from SWCS / SSO, it is queued in the scrutiny engine. Scrutiny engine picks the proposal one by one from the queue, scrutinizes the proposal in line with pre-configured bye-laws in fully automated manner, prepare observation report (in PDF format) and provide to the system. Scrutiny Engine uses AutoDCR platform of M/s SoftTech Engineers Ltd (OEM) for auto scrutiny of drawings. The system is configured with:
 - i. Unified Building Byelaws of Urban Development and Housing (UDH) department for all type of building proposal except industrial proposal i.e. Residential, Commercial, Institutional, Mixed-Use etc.
 - ii. Chief Minister Jan Awas Yojana building bye-laws received from UDH Dept.

Further, the system also has a pre-check facility on SWCS portal where any Architect or citizen can check the drawing before actually submitting the application to respective authority.

Both scrutiny engine (Live Application Server and Pre-check Server) are currently configured in High-Availability (HA) mode i.e. active-active configuration.
