3) Service Levels

a) Service Level Requirements

Service Level Agreements (hereinafter referred to as SLA) shall play an important role in defining the Quality of Services (QoS) that shall govern the level of service provided by the selected bidder.

Definitions:

- i. **“Scheduled Maintenance Time”** shall mean the time that the System is not in service due to a scheduled activity as defined in this SLA. Further, scheduled maintenance time is planned downtime with the prior permission of the Purchaser.
- ii. **“Scheduled operation time”** means the scheduled operating hours of the System for the month. All scheduled maintenance time on the system would be deducted from the total operation time for the month to give the scheduled operation time
- iii. **“System or Application downtime”** means accumulated time during which the System is totally inoperable within the Scheduled Operation Time but outside the scheduled maintenance time and measured from the time RISL and/or its employees log a call with the SI team of the failure, or the failure is known to the SI from the

availability measurement tools to the time when the System is returned to proper operation.

- iv. “**Availability**” means the time for which the services and facilities are available for conducting operations on the application. Availability is defined as:

$$\{(Scheduled\ Operation\ Time - System\ Downtime) / (Scheduled\ Operation\ Time)\} * 100\%$$

- v. **Bidder** shall provide “**Helpdesk Support**” on 24x7 basis which shall include Fault reporting, Trouble Ticketing and related enquiries during this contract.
- vi. “**Incident**” refers to any event / abnormalities in the functioning of the Data Centre Services that may lead to disruption in normal operations of the Data Centre, System or Application services.
- vii. “**Resolution Time**” shall mean the time taken (after the incident has been reported at the Helpdesk), in resolving (diagnosing, troubleshooting and fixing) or escalating (to the second level, getting the confirmatory details about the same and conveying the same to the end user), the services related troubles during the first level escalation. The resolution time shall vary based on the severity of the incident reported at the Helpdesk.

The severity would be as follows:

- i. **Critical:** Incidents which impact the overall solution like a set of services is down and which has a high impact on service delivery to the dependent projects. Any incident which is affecting a concurrent user.
- ii. **Major:** Incidents which impact (down) minimum a service. e. g. the application is up and running but certain applications are unable to the call services due to technical issues.
- iii. **Minor:** Incidents whose resolution shall require cosmetic changes in application, which will not significantly impact and interrupt the working of the application. Incidents like functionality enhancement and/or support for modifications or maintenance of source code, application version enhancement etc.

Interpretations:

- a) The working hours of RISL are 9AM to 6PM on all working days excluding Public Holidays or any other Holidays observed by the RISL. The SI however recognizes the fact that the RISL offices will require to work beyond the working hours on need basis.
- b) The SLA parameters shall be monitored on a monthly basis as per the individual SLA parameter requirements. However, if the performance of the system/services is degraded significantly at any given point in time during the contract and if the immediate measures are not implemented and issues are not rectified to the complete satisfaction of RISL or

an agency designated by them, then the RISL will have the right to take appropriate disciplinary actions including termination of the contract.

- c) A Service Level violation will occur if the SI fails to meet Minimum Service Levels, as measured on a half yearly basis, for a particular Service Level. Overall Availability and Performance Measurements will be on a monthly basis for the purpose of Service Level reporting. An “Availability and Performance Report” will be provided by the SI on monthly basis in the RISL suggested format and a review shall be conducted based on this report. The report shall contain the summary of all incidents and performance measurement for that period. Where required, some of the Service Levels will be assessed through audits or reports e.g. utilization reports, measurements reports, etc., as appropriate to be provided by the SI on a monthly basis, in the formats as required by the RISL. The tools to perform the audit will need to be provided by the SI. Audits will normally be done on regular basis or as required by the RISL and will be performed by the RISL or the appointed third-party agencies.
- d) The selected SI must utilize the existing EMS tool of the State Data Centre and develop additional scripts (if required) for capturing the required data for SLA report generation in automated way. This tool should generate the SLA Monitoring report in the end of every month which is to be shared with the RISL on a quarterly basis.
- e) **Dependencies:** The dependencies on the performance of services beyond the control of either party and where default is due to reasons beyond the control of the selected bidder or due to reasons attributable to RISL or third parties designated by RISL, the SI would not be penalized. For example, if uptime of a particular equipment/ application is desired and this is due to non-availability of power (which is out of scope of work of the selected bidder), then the time period during which a service was unavailable due to non-availability of power would be removed while calculating the uptime.
- f) **Monitoring & Evaluation:** The selected bidder shall provide and make use of following system for monitoring and evaluation

S. No	SLA	Monitoring System
1	Down Time of Application software	Through EMS application available at RSDC
2	Non-Availability of Manpower	Attendance Register at each project location
3	Delay in performing software support like upload	Through a web base/phone line call log available

content/ bugs fixing/ minor change request	at IT help desk
